**To:** Blue Team

**Subject:** Patch Your Systems

I know this is old hat and you have likely already started patching your systems. I want to make sure you have a strategy to best maximize the up-time of services, so get me some specifics. We cannot make our staff or researchers too angry with unscheduled downtime. Please upload a document to the Blue Team portal letting me know:

- 1) The 3 systems you consider(ed) most critical and why.
- 2) What is/was your plan for prioritizing the order you patched (by service, by operating system, most outdated first, alphabetical order, etc.)
- 3) What steps and/or planning did you consider to minimize downtime of user facing services

I do need specifics. A few paragraphs or bullet points bullet points are acceptable. This document is due on 30 minutes. You do not need to have completed all patching before submitting. I only am looking for your planning.

I also suggest implementing a patch and change log in case I ask for one later.

Thank you.
