To: Blue Team

Subject: Nmap your subnet

The central campus administrators have become concerned about our recent attacks. The Internal Auditors will be conducting a security review and have asked for network details. They have demanded a Nmap scan of every system in your subnet and an visual topology in 2 hours. Please compare the results to you earlier inventory and flag any ports or services previously not identified.

Please note: Reverse DNS is not necessary. Excluding reverse DNS lookup should speed up your scan. Upload the output Nmap scan and topology file to the Blue Team portal when you are finished. You may use a drawing tool of your preference.

Thank you.
